

# Roshan Vijay

Senior Software Engineer | .NET Full Stack Developer

📞 7349495469 • 📧 roshanshetty010100@gmail.com • 📍 Moodabidri, India (open to relocating to Hyderabad)

## PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with 4+ years of experience designing, developing, and deploying data-driven, web-based applications using Microsoft technologies — .NET / .NET Core, ASP.NET MVC, C#, and Entity Framework. Skilled in building responsive Single Page Applications (SPA) with Angular / AngularJS, jQuery, and JavaScript, and in developing cloud-native solutions on Microsoft Azure (Azure Functions, Service Bus, Azure SQL). Strong command of OOPs, design patterns, architectural patterns, automated / unit testing, and CI/CD. Experienced across the full SDLC — requirement analysis, solution architecture and design, development, unit testing, and deployment. Recent experience spans the capital-markets / financial-services domain — delivering trading dashboards and reporting platforms — backed by excellent written and verbal communication skills and a track record of delivering moderate-to-complex projects.

## TECHNICAL SKILLS

**Languages & Frameworks:** C#, .NET / .NET Core (.NET 6+), ASP.NET MVC, ASP.NET Web API, OOPs, LINQ

**Front-End / SPA:** Angular / AngularJS, SPA Development, JavaScript, TypeScript, jQuery, HTML5, CSS3, React JS

**Microsoft Azure:** Azure Functions, Azure Service Bus, Azure SQL, Azure App Service, AKS, Azure API Management (APIM), Azure DevOps

**ORM & Data Access:** Entity Framework / Entity Framework Core

**Databases:** SQL Server, Azure SQL, Cosmos DB — Database Design, Stored Procedures, Views, Joins, Query Optimization, Performance Tuning

**Design & Architecture:** Design Patterns, Architectural Patterns, Microservices, RESTful APIs, Event-Driven Architecture

**DevOps & Tools:** Visual Studio 2017+, Source Control (TFS / Git / VSTS), Build Automation, CI/CD Pipelines, Automated / Unit Testing (xUnit, NUnit, MSTest), Docker, Kubernetes, Terraform

**Practices:** Agile / Scrum, SOLID Principles, Continuous Integration & Development, Code Reviews, Secure Coding (OAuth2 / JWT)

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer — GeakMinds Technologies

Client: Capula Investments Pvt. Ltd. (Capital Markets / Hedge Fund) • Chennai (Work From Home)

Apr 2026 – Present

- Working as a consultant for **Capula Investments**, a global capital-markets / hedge-fund firm, building financial trading and reporting applications with **C# / .NET Core** at the core.
- Developed **Trader Dashboard** — a responsive **Single Page Application (SPA)** built with **Angular, JavaScript, jQuery, HTML5, and CSS3**, backed by **C# / .NET Core RESTful APIs** — giving traders real-time visibility into positions and portfolio data.
- Built **One API**, a centralized **reporting tool / service** in **C# / .NET Core** that aggregates data from multiple sources and exposes secure REST endpoints for financial and operational reporting.
- Designed and optimized **SQL Server / Azure SQL** data models for reporting — authoring **stored procedures, views, and complex joins** with a focus on query optimization and performance tuning.

- Applied **design patterns and architectural patterns**, wrote **unit tests (xUnit / NUnit)**, and delivered changes through **CI/CD pipelines** with source control on **Git / Azure DevOps**.
- Partnered directly with client stakeholders in an **Agile** setting to gather requirements, design solutions, and deliver features for a fast-paced trading environment.

**Software Engineer — Cornerstone OnDemand**

Jun 2022 – Apr 2026

Pune, India

- Designed, developed, and deployed data-driven web applications using **.NET Core, C#, ASP.NET MVC**, and **Entity Framework Core** for the enterprise-scale Performance Goals module, owning the full SDLC from requirement analysis to deployment.
- Built responsive **Single Page Application (SPA)** interfaces using **Angular / AngularJS, JavaScript, jQuery, HTML5, and CSS3**, ensuring cross-browser compatibility and a high-quality user experience.
- Developed **Azure** cloud applications leveraging **Azure Functions** and **Azure Service Bus** for event-driven, asynchronous processing, with data persisted in **Azure SQL**, SQL Server, and Cosmos DB.
- Designed and optimized **SQL Server / Azure SQL** databases — authoring **stored procedures, views, and complex joins**, and performing query optimization and **performance tuning**.
- Applied **design patterns and architectural patterns** to build maintainable, scalable solutions; led migration of a monolithic .NET Framework application to a **microservices architecture** on Azure Kubernetes Service (AKS).
- Created **unit test plans and scenarios** and implemented automated / unit tests using **xUnit / NUnit**, following software development leading practices to maximize predictability and project success.
- Built and maintained **CI/CD pipelines and build automation** using **Azure DevOps**, with source control on **Git / TFS / VSTS**; provisioned infrastructure using Terraform and ARM templates.
- Analyzed client needs and technical requirements to create solution **architecture and design**; documented new development, procedures, and test plans.
- Implemented **OAuth2 / JWT** authentication and secure coding practices; identified and remediated security vulnerabilities (IDOR) through comprehensive code reviews.
- Conducted code reviews and mentored developers on modern practices and AI coding tools (GitHub Copilot, Amazon Q, Cody) in an **Agile / Scrum** environment.

**Associate Software Engineer — Allstate**

Sep 2021 – Jun 2022

Bangalore, India

- Developed backend services and **RESTful APIs** using **C# and .NET** for the Agent Portal of Allstate — an enterprise application in the financial services / insurance domain.
- Implemented business logic and data-access layers with **SQL Server**, including stored procedures, joins, and query optimization.
- Supported end-to-end implementation of **Adobe Analytics**, translating user interactions into actionable business insights.
- Collaborated with cross-functional teams (QA, architects, product owners) in an **Agile** environment and maintained high code quality following **SOLID principles** and code reviews.

**KEY PROJECTS**

- **Monolith-to-Microservices Migration (.NET / Azure):** Led end-to-end migration of a monolithic .NET Framework application to cloud-native microservices on Azure AKS, applying design patterns to improve scalability and deployment independence.
- **Edge Import Framework (Azure Service Bus):** Architected a high-volume, event-driven data ingestion framework using .NET Core, Azure Service Bus, and RabbitMQ with validation, security checks, and performance optimization; adopted across multiple teams.
- **Azure DevOps CI/CD & Automation:** Built automated build, test, and release pipelines with Azure DevOps, including containerized deployments to AKS and infrastructure-as-code with Terraform / ARM templates.

- **AI-Powered .NET Services:** Delivered AI-powered features (goal description generation, comment rephrasing) integrating LLM APIs into production .NET Core services on Azure.

## EDUCATION

---

**Bachelor of Engineering (B.E.), Information Science and Engineering** — 8.3 CGPA

Mangalore Institute of Technology & Engineering, Moodabidri • 2017 – 2021
